

Favour Emmanuel

Front End Developer | Nigeria | +234 901 453 5419 | femmaje@gmail.com | linkedin.com/in/femmy-em

Summary

Frontend Engineer with strong experience building scalable, high-performance, and user-focused web applications. I enjoy turning ideas and designs into clean, intuitive interfaces that people can use effortlessly. Passionate about creating seamless user experiences, writing maintainable code, and building products that truly solve real problems. Am Proficient in React, Next.js, TypeScript, and Tailwind CSS, with a focus on performance, structure, and reliability. Known for clear thinking, attention to detail, and strong collaboration across teams to consistently deliver quality products.

Work Experience

Inner Compass Well-being	Canada
Software Engineer	October 2025 - January 2026
- Coordinated Frontend and backend development tasks, timelines, and deliverables across multiple projects. - Acted as liaison between developers, designers, and stakeholders. - Maintained documentation, trackers, and reporting systems for team alignment.	
NamuLabs	Korea
Frontend Developer	October 2024 - April 2025
- Developed responsive and accessible interfaces using modern frontend tools. - Integrated blockchain features (crypto wallets), improving engagement. - Worked in agile teams delivering performant UI under tight timelines.	
NinoHairs	Lagos
Frontend Developer	March 2024 - July 2024
- Led frontend development for an eCommerce platform. - Built dashboards, authentication systems, and admin tools. - Integrated APIs to streamline inventory and product workflows.	
Turing	Remote
LLM Trainer	June 2025 - July 2025
- Trained and evaluated large language models (LLMs) by crafting coding prompts, reviewing AI-generated outputs, and delivering structured feedback. - Focused on code correctness, edge-case detection, and semantic reasoning across JavaScript, Python, HTML, and Bash. - Simulated real-world developer workflows using annotation tools to improve model performance in practical coding scenarios. - Collaborated with researchers and engineers to enhance training data quality and annotation consistency. - Improved model capabilities in instruction-following, debugging, and software engineering reasoning.	

Technical Skills

UX Design · Node.js · Prompt Engineering · Bash · Code Review · Debugging · Git · HTML · Javascript · Next.js · Python · React · REST APIs · Technical Writing · TypeScript · TailwindCSS · Code Annotation · AI Evaluation · VS Code · Jupyter · Agile Collaboration

Education

ALX Africa

Bachelor of Engineering (BEng) | Software Engineering

University of Benin

B.Eng | Chemical Engineering
