

Favour Emmanuel

Frontend Developer | Nigeria | +234 901 453 5419 | femmaje@gmail.com | <http://favouremmanuel-ivory.vercel.app/> | [linkedin.com/in/femmy-em](https://www.linkedin.com/in/femmy-em) | github.com/VSOLUTIONSE

Professional Summary

Frontend Engineer with experience building high-performing web applications across fintech, healthcare, AI, business, and eCommerce products. Skilled in modern frontend architecture, with a strong focus on performance optimization, reusable component systems, API integrations, and responsive user experiences. Experienced collaborating across product, design, and engineering teams to deliver scalable, user-focused applications in fast-paced startup environments, helping transform ideas into functional digital products.

Core Technologies

Frontend | React, Next.js, TypeScript, JavaScript, Tailwind CSS, Redux, Zustand, React Query, Framer Motion, GSAP

Backend & APIs | Axios , Node.js, Express.js, REST API, Firebase, Supabase.

Web3 | ethers.js, WalletConnect

Testing & Tools | Jest, Git, GitHub, Docker, CI/CD, Vercel, Chrome DevTools, VS Code, Jira, Figma

AI & Collaboration | Agentic Coding, Prompt Engineering, LLM Evaluation, Code Review, Agile Collaboration. Claude code. Copilot. MCP tooling.

Professional Experience

Inner Compass Well-being Canada

Software Engineer

Remote

October 2025 - January 2026

- Contributed to the development of therapist management dashboards and frontend systems for a healthcare-focused platform.
- Integrated APIs with frontend applications to support real-time therapist workflows and platform functionality.
- Coordinated frontend and backend development efforts across teams, improving communication, delivery alignment, and feature implementation.
- Maintained project documentation, reporting systems, and task tracking processes to support efficient team collaboration.

Turing

LLM Trainer

Remote

June 2025 - July 2025

- Evaluated and improved large language model performance through structured prompt engineering, debugging analysis, and code evaluation workflows.
- Assessed AI-generated outputs across JavaScript, Python, HTML, and Bash, contributing to improved reasoning accuracy and instruction-following quality.
- Conducted multi-turn prompt evaluations and edge-case testing against leading AI models including Claude and GPT.
- Collaborated with research and engineering teams to improve annotation consistency and training data quality.

NamuLabs

Frontend Developer

Remote, Korea

October 2024 - April 2025

- Built production-grade frontend applications for Web3 platforms including Piggycell and Kinc using React, TypeScript, and modern frontend tooling.

- Developed responsive user interfaces for blockchain-powered products focused on decentralized ownership, lending, and community engagement.
- Improved wallet connection flows and frontend responsiveness using ethers.js and WalletConnect integrations.
- Collaborated closely with designers, backend engineers, and stakeholders to deliver scalable and accessible user experiences under tight delivery timelines.

NinoHairs

Frontend Developer

Lagos, Nigeria

March 2024 - July 2024

- Led frontend development for an eCommerce startup platform, building responsive interfaces, authentication workflows, and admin management systems.
- Developed an admin dashboard that streamlined inventory and stock management across 200+ products.
- Integrated Paystack payment systems and backend APIs to support secure transactions and operational workflows.
- Worked cross-functionally with product and engineering teams to deliver MVP features quickly in a fast-paced startup environment.

Some Projects

Tech Care Health Dashboard

- Built a responsive healthcare dashboard for medical professionals to manage patient records, diagnosis history, vital signs, diagnostics, and laboratory results.
- Developed using React 19, TypeScript, Tailwind CSS, React Query, Recharts, Framer Motion, and Radix UI.
- Implemented reusable UI components, API integration workflows, interactive charts, and responsive dashboard layouts.

Kinc

- Contributed to the frontend development of a blockchain-powered lending platform connecting USDT holders with businesses seeking short-term funding.
- Built scalable user interfaces and integrated blockchain wallet functionality to support secure and accessible user interactions.

Education

ALX Africa

Bachelor of Engineering (BEng) | Software Engineering

University of Benin

B.Eng | Chemical Engineering

Skills

Agile Collaboration · Prompt Engineering · Tailwind CSS · VS Code · CI/CD · Code Review · Docker · Express.js · Figma · Firebase · Git · Github · Javascript · Jest · Jira · MongoDB · Next.js · Node.js · PostgreSQL · React · Redux · REST APIs · TypeScript · Vercel · Zustand · React Query · Framer Motion · GSAP · Supabase · ethers.js · WalletConnect · Chrome DevTools · LLM Evaluation
